## 1. BS Health Care Management (BSHCM)

The BS in Health Care Management is a dynamic undergraduate program designed to prepare future leaders in healthcare administration and service delivery. With a focus on health systems, organizational management, and strategic planning, the program equips students to navigate and lead within public and private health institutions. The curriculum blends health sciences, management principles, and policy frameworks to drive effective healthcare delivery and reform.

### Program Objectives

- To equip the students with health awareness and best health care services for the society.
- To learn the healthcare system and its implications in relevant institutions of health care.
- To induce the skill to manage all issues including maintenance, legal, ethical, community and hospital.

### Eligibility for Admission

Students with FA, FSc, or equivalent qualifications and having at least second division, securing 45% marks are eligible to apply.

### Degree Requirements

The BSHCM program is of a 4 year duration, spread over 8 regular semesters, and consists of 132 credit hours of studies. The normal duration for completion of BSHCM Degree is semesters over a period of 4 years. The maximum duration for obtaining BSHCM degree shall be 7 years.
